

Psychosocial & Mental Health of Children in Conflict with the Law (Age 16 to 18 Years) Preliminary Individual Assessment Report for Juvenile Justice Board

As per the JJ Act 2015, the objective of the preliminary assessment of a child, is to 'evaluate the role of the child in the alleged offence, as well as his mental condition and background'. In keeping with this, the psychosocial and mental health assessment report provides information on the child's mental condition and background, namely the developmental level of the child, family history and relationships, school and education, involvement in child labour, peer relationships and experiences of trauma and abuse; it also provides information on any mental health disorders and developmental disabilities that the child may have. Finally, the report makes recommendations for treatment and rehabilitation interventions for the child. The report presents the above-said information using the framework proposed by JJ Act 2015 i.e. whether the child has the mental and physical capacity to commit the offence, the circumstances of the offence committed, whether the child knew the consequences of the offence.

Date of Assessment:

Implementing Agency/ Person/ Designation:

Name of Child:

Age:

Sex:

Male

Place of Origin:
